Projects

StayHub Web Application

10/2025 – 11/2025

- Developed a web-based application called StayHub for accommodation or property-related services.
- Built and deployed the project using Firebase Hosting.
- Focused on responsive design, user-friendly interface, and smooth navigation for web users.
- Applied web development skills in front-end implementation, system structure, and deployment.
- Project Link: final-proj-ed41d.firebaseio.com

Student E-Handbook – Mobile Application Project

2025 – 2025

- Designed and developed Student E-HandBook, an Android-based mobile application for digital student handbook access.
- Used Java as the main programming language for the project.
- Structured the application using standard Android project components, including the app folder and Gradle build files.
- Strengthened practical skills in mobile app development, Android project setup, and Java programming.

SKYCLASH: ARENA OF LEGENDS - Game Development Project , 2D Game

2026 – 2026

- Developed **SKYCLASH: ARENA OF LEGENDS**, a 2D action game using Unity and C#
- Implemented player movement, combat, enemies, character abilities, and basic gameplay systems.
- Designed game stages, UI elements, animations, and interactive gameplay features.
- Created a website to showcase the game's concept, characters, stages, and features.
